

TRAFFORD CENTRE OUR FUTURE

Our vision

We will minimise Trafford Centre's impact on the environment and make a positive contribution to our communities, people, and visitors.

What does this mean?

For Our Future – our sustainability and social impact strategy – focusses on positive environmental and social change, bringing together Trafford Centre's colleagues, tenants, and the local community.

Our objectives

Achieve Net Zero Carbon in Scope 1 and 2 emissions by 2030, whilst working with our tenant brands to help support their carbon reduction initiatives, as part of our Scope 3 commitments.

Enhance our pledge to being a socially responsible business operator and looking after the people who work at Trafford Centre.

Become a positive environmental role model for other retail businesses.

Working together to make a lasting impact by protecting our people and communities.

Get involved

For Our Future is a commitment for the years to come, as we continue to develop solutions. Join us on our journey at: Traffordcentre.co.uk/ForOurFuture

Key focus areas

Our key focus areas will span across everything we do at Trafford Centre. The current priorities include:

Reduce our greenhouse gas emissions

Reduce energy consumption and waste

Enhancing biodiversity in our outside space

Promoting equality, diversity and inclusion

Community projects and social value

Introducing Solar Power and more EV charging

Replace all existing external lights with LEDs

On-site waste segregation target of 65% by 2025

Green lease scheme for tenants

Increasing investment and engagement with our communities

Gather data to measure our progress over time as part of our commitment to the highest standards of Environmental Social Governance (ESG).

Evaluate our decarbonisation performance and identify potential challenges using the Carbon Risk Real Estate Monitor ("CRREM").

Meet the requirements of targeted environmental building schemes such as BREEAM In-Use, with the ambition to achieve at least "Very Good" rating by 2027.
